ABDUL WADUD ALOM

Software QA Engineer

Total Experience: 4+ Years

SUMMARY

Software QA Engineer with over 4 years of experience in the technology industry. Well versed in developing & executing comprehensive test plans, identifying & reporting defects, and working with cross functional teams to deliver high-quality products. Expertise in functional, API, load and performance testing with utilizing Jenkins CI/CD Pipeline, JMeter, SIPP Scripts.

Employment Details

Telaverge Communication Pvt. Ltd. – Software QA Engineer (Nov 2021 – Apr 2026)

Professional Experience

Mar 2026 – Till Now

-TNS TelePacific (TPX)-NGIN Apps:

Technologies: SIP Protocol, SIPP Script, Jenkins

Responsibilities:

- Prepared ATP for STIR/Shaken CR.
- Testing the different features of NGIN Apps like DNIS, CAS,BPN etc.
- Created SIPP Script to Run SIPP Call for Different Features & Created Test Data suite to run the call through Jenkins CI/CD pipeline.
- Exposure of CAS Platform where application is deployed & debug the failed calls through CAS log, Analyze PCAP through Wireshark for validating call flow & Validate Final CDR with the FSD.

Feb 2024 - Mar 2026

- TNS Service Node (Soft Bank):

Technologies: SIP Protocol, SIPP Script, Jenkins, SOAP UI, JMeter.

Responsibilities:

- Prepared ATP for Various Feature for Functional testing
- Testing All the Features of ATF Apps Like Call Rejection, Advance Call Distribution, Call Queuing, After Hour Guidance, Call Forwarding, Screening by Terminal Type, Number Portability etc.
- Created SIPP Script to Run SIPP Call for Different Features & Created Test Data suite to run the call through Jenkins CI/CD pipeline.
- Validate APIs through SOAP UI.
- Created API Provisioning Automation Sheets & Feature Provisioning Automation Sheets by passing the SOAP Payload & required Parameter in the sheet.
- Performed Call Load Test with B2B calls & ACD Round Robbin Calls

- Created JMeter Script for API Performance testing.
- End to End execution of call & Root cause analysis of failure.
- Analysis of Issues reported by customers & performed sanity on customer Lab.

Mar 2023 – Feb 2024

- DIAMETER STACK:

Technologies: Diameter Base Protocol and Various Interfaces, e.g., Gx, Rx, Sy, s6a, etc., TCP, SCTP, Seagull

Responsibilities:

- Load Testing
- Testing the different features of the Diameter stack application.
- Used the Seagull tool for diameter protocol simulation.
- Understood the design from RFC-6733 and 3GPP specifications and wrote a seagull script for a specific interface of diameter base protocol.

Nov 2022 – Mar 2023

-NN ELK

Technologies: Elasticsearch, Kibana Dashboard, Logstash, Diameter, SS7

Responsibilities:

- Performance Testing
- KPI's development.
- Performance Testing through Scripts.
- Exposure to the Kibana Platform
- Understanding the design from FSD and performing performance testing.

Nov 2021 – Nov 2022

-KDDI VPN, ATF

Technologies: SIP, ISUP, ADE, CAS, Plsql

Responsibilities:

- ADE development
- Stored procedure development
- Unit/Integration Testing with Sipp, X-lite.
- Exposure to the CAS Platform
- Understanding the design from FSD and implementation
